DETAILED ACTION

1. Claims 1-9 are currently pending in this application.

Please Note: In an effort to enhance communication with our customers and reduce processing time, a dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Andrew Wang, Supervisory Patent Examiner at andrew.wang@uspto.gov or 7(703)306-3217. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CAR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to an expression library comprising a repertoire of nucleic acid sequences cloned from a non-immunized source.

Art Unit: 1627

Group II, claim(s) 5, drawn to a method of preparing a library according to claim 3 or 4.

Group III, claim(s) 6, drawn to use of a non-immunized source of nucleic acid sequences encoding at least a part of variable domain of heavy chain.

Group IV, claim(s) 7, drawn to a method for preparing antibody fragments.

Group V, claim(s) 8, drawn to a method for preparing an antibody derived from a non-immunized source having binding specificity for a target antigen.

Group VI, claim(s) 9, drawn to use of an non-immunized source of nucleic acid sequences.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of group I is a library comprising a repertoire of nucleic acid sequences encoding at least part of a variable domain of a heavy chain. The special technical feature of group I is known in the prior art. (i.e., see Finnern et al (D1 in the Search Report). Finnern et al disclose phage display libraries comprising a repertoire of B cell RNA-derived rearranged variable genes from non-immunized humans.) Thus, the inventions lacks unity.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Art Unit: 1627

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
